

Behavioral Health Profile

Newton County

May 2014

Located in Southwest Missouri, Newton County has a population of 58,845. Among Missouri's 114 counties plus the city of St. Louis, Newton County ranks 18 in terms of population. Newton County's unemployment rate in 2013 was 5.6%. This was lower than the statewide unemployment rate of 6.5%. In 2012, the poverty rate was 16.6% which was higher than the statewide poverty rate of 16.2%. The median income of the county was \$41,623.

Substance Use and Abuse in Newton County

The availability of county-level data on substance use and abuse is limited. The Missouri Student Survey can provide estimates for youth in most Missouri counties. This survey is administered in even-numbered years to 6th through 12th grade students in participating school districts.

Healthy People 2020, a set of federal goals, has established objectives to reduce tobacco initiation and use by adolescents and adults. In Newton County, 44.2% of youth believe that it would be easy to get cigarettes and 38.2% have friends who smoke.

Youth who use alcohol are at greater risk of developing abuse problems later in life. An estimated 43.8% of youth in Newton County believe that it would be easy to get alcohol and 43.8% have friends who drink alcohol.

Marijuana use is of increasing concern across the state. In 2012, 25.7% of Newton County youth said that marijuana is easy to get, 23.6% report having at least one friend that uses it and 8.3% said that smoking marijuana is 'no risk at all'.

In Newton County, 15.1% of youth believe that it would be easy to get other drugs such as cocaine, methamphetamine, and ecstasy.

Substance Use Consequences in the County

Health: In 2011, Newton County residents had a total of 232 alcohol-related and 179 drug-related hospitalizations. In addition there were 187 alcohol-related and 214 drug-related ER visits that did not include a hospital stay.

Treatment: In 2012, 19.2% of mothers in Newton County reported smoking during their pregnancy. This is an increase from 2011 (19.1%).

Substance Abuse Treatment in Newton County

Total	302
Alcohol Primary	136
Marijuana Primary	67

Law Enforcement: In 2012, Newton County had 341 DWI arrests, 39 liquor law violations and 160 drug-related arrests. Newton County had 34 methamphetamine laboratory seizures in 2012 and 29 in 2013. The manufacture of methamphetamine has been particularly problematic for rural Missouri. Specifically, labs tend to be clustered primarily in the counties surrounding St. Louis and secondarily in the southwest and southeast areas of the state.

Traffic Crashes in Newton County

Alcohol-related traffic crashes decreased in the last year (from 76 in 2011 to 69 in 2012). Alcohol-related crashes are more likely to produce fatalities and injuries compared to non-alcohol-related crashes.

2012 Number of Alcohol-Related Crashes by Severity				2012 Number of People Injured / Killed in Alcohol and Drug-Related Crashes			
Total Crashes	Fatal Crash	Crash w/ Injury	Crash w/ Property Damage	Alcohol Fatalities	Alcohol Injuries	Drug Fatalities	Drug Injuries
69	2	31	36	2	42	0	13

Mental Health in Newton County

Individuals struggling with serious mental illness are at higher risk for homicide, suicide, and accidents as well as chronic conditions including cardiovascular and respiratory diseases and substance abuse disorders. In state fiscal year 2013, 841 Newton County residents received treatment for serious mental illness at publicly-funded facilities. See table for details. While there is data on those who receive treatment, data on mental health in the general population is very limited. This is especially true at the local level.

In Southwest Missouri, 22.8% of those 18 and older had a mental illness in the past year with 6.3% having a serious mental illness. Serious mental illness is defined as any of the mental disorders asked about and 'these disorders resulted in substantial impairment in carrying out major life activities'.

Approximately 8.2% of Southwest Missouri residents ages 18+ had at least one major depressive episode in the past year. A major depressive episode is characterized by an extended period of depressed mood, loss of interest or pleasure, and impaired functioning. Typically females are more likely to report having had a major depressive episode.

Students (6th-12th grade) in the county were asked about their mental health. 11.4% had considered suicide in the last year, 7.7% made a plan, and 1.7% actually attempted, resulting in an injury. In 2012, 13 Newton County residents committed suicide. Nationally, males are about four times more likely to commit suicide than females. Older males have higher rates of suicide than younger males.

Comprehensive Psychiatric Services Numbers Served in Newton County		
	<u>FY2012</u>	<u>FY2013</u>
Total	908	841
Adjustment Disorder	81	29
