

Behavioral Health Profile

Saint Charles County

May 2014

Located in Eastern Missouri, Saint Charles County has a population of 373,495. Among Missouri's 114 counties plus the city of St. Louis, Saint Charles County ranks 3 in terms of population. Saint Charles County's unemployment rate in 2013 was 5.6%. This was lower than the statewide unemployment rate of 6.5%. In 2012, the poverty rate was 7.1% which was lower than the statewide poverty rate of 16.2%. The median income of the county was \$70,456.

Substance Use and Abuse in Saint Charles County

The availability of county-level data on substance use and abuse is limited. The Missouri Student Survey can provide estimates for youth in most Missouri counties. This survey is administered in even-numbered years to 6th through 12th grade students in participating school districts.

Healthy People 2020, a set of federal goals, has established objectives to reduce tobacco initiation and use by adolescents and adults. In Saint Charles County, 46.3% of youth believe that it would be easy to get cigarettes and 36.9% have friends who smoke.

Youth who use alcohol are at greater risk of developing abuse problems later in life. An estimated 57.5% of youth in Saint Charles County believe that it would be easy to get alcohol and 47.2% have friends who drink alcohol.

Marijuana use is of increasing concern across the state. In 2012, 33.6% of Saint Charles County youth said that marijuana is easy to get, 34.4% report having at least one friend that uses it and 9.3% said that smoking marijuana is 'no

In Saint Charles County, 14.2% of youth believe that it would be easy to get other drugs such as cocaine, methamphetamine, and ecstasy.

Substance Use Consequences in the County

Health: In 2011, Saint Charles County residents had a total of 637 alcohol-related and 714 drug-related hospitalizations. In addition there were 965 alcohol-related and 1269 drug-related ER visits that did not include a hospital stay.

Treatment: In 2012, 11.2% of mothers in Saint Charles County reported smoking during their pregnancy. This is an increase from 2011 (11.2%).

Substance Abuse Treatment in Saint Charles

Total	1024
Alcohol Primary	581
Marijuana Primary	132

Law Enforcement: In 2012, Saint Charles County had 2169 DWI arrests, 705 liquor law violations and 1422 drug-related arrests. Saint Charles County had 156 methamphetamine laboratory seizures in 2012 and 119 in 2013. The manufacture of methamphetamine has been particularly problematic for rural Missouri. Specifically, labs tend to be clustered primarily in the counties surrounding St. Louis and secondarily in the southwest and southeast areas of the state.

Traffic Crashes in Saint Charles County

Alcohol-related traffic crashes decreased in the last year (from 325 in 2011 to 290 in 2012). Alcohol-related crashes are more likely to produce fatalities and injuries compared to non-alcohol-related crashes.

2012 Number of Alcohol-Related Crashes by Severity				2012 Number of People Injured / Killed in Alcohol and Drug-Related Crashes			
Total Crashes	Fatal Crash	Crash w/ Injury	Crash w/ Property Damage	Alcohol Fatalities	Alcohol Injuries	Drug Fatalities	Drug Injuries
290	5	106	179	5	169	3	25

Mental Health in Saint Charles County

Individuals struggling with serious mental illness are at higher risk for homicide, suicide, and accidents as well as chronic conditions including cardiovascular and respiratory diseases and substance abuse disorders. In state fiscal year 2013, 2345 Saint Charles County residents received treatment for serious mental illness at publicly-funded facilities. See table for details. While there is data on those who receive treatment, data on mental health in the general population is very limited. This is especially true at the local level.

In Eastern Missouri, 20.7% of those 18 and older had a mental illness in the past year with 5.0% having a serious mental illness. Serious mental illness is defined as any of the mental disorders asked about and 'these disorders resulted in substantial impairment in carrying out major life activities'.

Approximately 7.0% of Eastern Missouri residents ages 18+ had at least one major depressive episode in the past year. A major depressive episode is characterized by an extended period of depressed mood, loss of interest or pleasure, and impaired functioning. Typically females are more likely to report having had a major depressive episode.

Students (6th-12th grade) in the county were asked about their mental health. 9.6% had considered suicide in the last year, 7.2% made a plan, and 1.5% actually attempted, resulting in an injury. In 2012, 25 Saint Charles County residents committed suicide. Nationally, males are about four times more likely to commit suicide than females. Older males have higher rates of suicide than younger males.

Comprehensive Psychiatric Services Numbers Served in Saint Charles County

	<u>FY2012</u>	<u>FY2013</u>
Total	2330	2345
Adjustment Disorder	35	21
