<p>Expected Death <input type="checkbox"/> Deaths that are anticipated, considered likely or probable given the diagnosis and/or prognosis. Examples may include such circumstances as a consumer receiving hospice services; multiple and complex chronic medical condition(s) where death may not be imminent but life expectancy was limited; consequent to hospitalization due to a existing life-threatening medical/physical condition.</p> <p>Briefly explain</p>		
<p>Unexpected Death <input checked="" type="checkbox"/> Deaths that occur without warning or are unanticipated. Examples may include such circumstances as sudden cardiac arrest; choking; death of a consumer who otherwise appeared healthy; death as a result of an accident; suicide or homicide; a death which was otherwise unforeseen.</p> <p>Briefly explain-Consumer was awakened at 6:30 AM as is the usual practice. Consumer started walking toward the restroom and collapsed. CPR was initiated but the consumer remained unconscious. The ambulance arrived and transported the consumer to the ER where he was pronounced dead. Initial cause of death was reported to be a "massive heart attack".</p>
