CLINICAL SUPERVISION AND TEACHING

Psychiatric Residents and Medical Students:

During the period of time that I worked on an acute inpatient service at Mid-Missouri Mental Health Center, I provided residents with individual case supervision, as well as supervised medical students during their 8 week psychiatry rotation. I also served as a guest lecturer in the Medical School's Health and Human Behavior sequence.

Psychology Clerk Programs:

During the year 1983, I provided supervision to a psychology graduate student as part of an NIMH funded Behavioral Medicine training grant that I helped write through the UMC Department of Psychology.

I also developed and served as the Director of a Clerkship Program that was established as part of a cooperative effort between the Mid-Missouri Mental Health Center and the UMC Department of Psychology. This program includes seven 1/2 time clerks. I supervised 2 of these students directly through a placement at the Center's alcohol and drug abuse unit, and the other 5 clerks were supervised by other psychologists throughout the Center.

GRADUATE LEVEL COURSES IN PSYCHOLOGY

Psychology 418: Applied Research in Mental Health

This course is a 3-hour graduate level seminar that I taught between 1979-1981. Graduate students in clinical and counseling psychology, social work and psychiatric nursing were eligible to enroll.

Psychology 445: Clinical Practicum

This is a 3 hour graduate level course that I have taught sporadically since 1986. It entails individual and group case supervision of 4-6 graduate students in Clinical Psychology who are seeing patients at the Psychological Clinic.

Thesis/Dissertation:

I serve on several thesis/dissertation committees per year for students in graduate programs in clinical and counseling psychology and nursing.

OTHER RESPONSIBILITIES

I provided all counseling and psychotherapy services to Department of Intercollegiate Athletics varsity athletes at the University of Missouri-Columbia, 1987-2008.
