H2017HOHQ	Psychosocial Rehabilitation Services (15 min) Masters Degree Level, Group Setting	CPR	5-125
H2014HA	Family Assistance	CPR	0-25

Age Increase Note:

In many cases, the young adult (ages 16 to 25) diagnosed with serious mental health conditions is in need of services from both the children's and adult systems at the same time. This does not in any way mean that the services are duplicative, but simply that the services wrapped around the young adult are individualized and able to meet their clinical needs for their developmental age. Ideally, the services for the young adult population are a combination of adult and children's services.
