

## MO Division of Developmental Disabilities

# -FAMILY FOCUS GROUP-

Purpose: The MO Division of DD wants to hear from families and is hosting Family Focus Group sessions across the state to collect information and feedback from individuals who have a developmental disability and family members regarding the supports and services they want, need, and utilize. Family representatives should have lived experiences in supporting a family member with a developmental disability. The Division of DD will use the information shared to help design the service delivery system to be more responsive to individual and family needs.
