

Behavioral Health Profile

Carter County

2017

Carter County is located in Southeast Missouri and had a population of 6,263 in 2015. Carter County ranks 106 in population size among Missouri's 114 counties plus the city of St. Louis. The 2016 unemployment rate in the county was 7.0%. This was higher than the statewide unemployment rate of 4.5%. In 2015, the poverty rate was 21.4% which was higher than the statewide poverty rate of 14.8%. The median income of the county was \$32,269.

Substance Use in Carter County

The availability of county-level data on substance use is limited. The Missouri Student Survey convenience sample can provide estimates for youth in most Missouri counties. This survey is administered in even-numbered years to 6th through 12th grade students in participating school districts. Adult data are available at the regional level from the NSDUH.

Alcohol is the most commonly used substance by youth in Missouri. An estimated 69.6% of youth in Carter County believe that it would be easy to get alcohol and 48.3% believe that using alcohol presents only 'slight' or 'no risk' of harm. The average age of first use is 13.4 and 63.4% have at least one friend that uses alcohol.

Cigarette use, both standard and electronic, is of concern across the state. The average age that county youth first use standard cigarettes is 12.7. An estimated 68.5% of youth believe that it would be easy to get cigarettes and 64.8% to get e-cigarettes.

Prescription drug misuse is of growing concern both across the nation and in Missouri. In Carter County, 44.2% of youth believe that they would be easy to get. Most youth report that there is a risk of harm when misusing prescription drugs, but 7.5% of youth believe that there is 'slight' or 'no risk at all'. Pain medication was the most commonly misused prescription medication by youth across the state. Most Missouri youth get prescription drugs from a friend or family member.

Marijuana use in Missouri youth continues to be of interest, particularly with recent shifts in legality of adult use across the nation. In 2016, 50.0% of county youth said that marijuana is easy to get, 29.3% report having at least one friend that uses it, and 24.4% believe that there is only a 'slight' or 'no risk' of harm from smoking marijuana once or twice a week. The average age of first use is 13.5.

Substance Use Consequences in the County

Health: In 2014, Carter County residents had a total of 1 alcohol-related and 2 drug-related hospitalizations. In addition there were 11 alcohol-related and 6 drug-related ER visits that did not include a hospital stay.

Treatment: In 2015, 57 individuals were admitted into Substance Abuse Treatment Programs. A total of 20 were primarily due to alcohol, 19 were primarily due to marijuana, and less than 5 were primarily due to prescription drugs.
