2015 Number of Alcohol-Related Crashes by Severity				2015 Number of People Injured / Killed in Alcohol and Drug-Related Crashes			
Total Crashes	Fatal Crash	Crash w/ Injury	Crash w/ Property Damage	Alcohol Fatalities	Alcohol Injuries	Drug Fatalities	Drug Injuries
6	1	2	3	1	5	1	3

Mental Health Data for Lewis County

Individuals struggling with serious mental illness are at higher risk for homicide, suicide, and accidents as well as chronic conditions including cardiovascular and respiratory diseases and substance use disorders. In state fiscal year 2015, 79 Lewis County residents received treatment for serious mental illness at publicly-funded facilities. See table for details. While there are data on those who receive treatment, data on mental health in the general population is very limited. This is especially true at the local level.

Numbers Served in Lewis County			In Central Missouri, 19.0% of those 18 and older had a mental illness in the past year with 5.0% having a serious mental illness. Serious mental illness is defined as any of the mental disorders asked about and 'these disorders resulted in substantial impairment in carrying out major life activities'.
	<u>FY2014</u>	<u>FY2015</u>	
Total	68	79	Approximately 7.3% of Central Missouri residents ages 18+ had at least one major depressive episode in the past year. A major depressive episode is characterized by an extended period of depressed mood, loss of interest or pleasure, and impaired functioning. Typically, females are more likely to report having had a major depressive episode.
Adjustment Disorder	*	*	
Anxiety Disorder	27	31	
Developmental Disorder	*	*	
Impulse Control Disorder	27	27	
Mood Disorder	52	61	
Psychotic Disorder	*	7	
These numbers indicate the number of clients seen with each diagnosis per year. An individual client may have more than one admission within a year. *Counts under 5 suppressed to protect identities			In 2014, 4 Lewis County residents died by suicide. Typically, males and whites are most likely to die by suicide.
