

Behavioral Health Profile

Hickory County

2018

Hickory County is located in Southwest Missouri and had a population of 9,374 in 2016. Hickory County ranks 90 in population size among Missouri's 114 counties plus the city of St. Louis. The 2016 unemployment rate in the county was 5.6%. This was higher than the statewide unemployment rate of 4.5%. In 2016, the poverty rate was 19.3% which was higher than the statewide poverty rate of 14.0%. The median income of the county was \$33,649.

Substance Use in Hickory County

The primary data source available for this section is the Missouri Student Survey. Due to privacy concerns for individual school districts, Missouri Student Survey data for this county cannot be distributed. Adult data are available from the National Survey on Drug Use and Health (NSDUH) at the regional level.

Alcohol is the most commonly used substance in Missouri adults. In the Southwest region, approximately 53.5% of adults currently drink alcohol, and 25.3% have had 5 or more drinks of alcohol on a single occasion in the past 30 days.

Cigarette use, in both standard and electronic forms, is of concern across the state. In the Southwest region, 31.9% of adults currently use cigarettes compared to 29% statewide.

Marijuana use in Missouri continues to be of interest, particularly with recent shifts in legality of adult use across the nation. Around 7.3% of adults report current marijuana use. Across the state, around 46.6% of adults believe there is 'slight' or 'no risk' of harm from smoking marijuana once or twice a week.

Prescription drug misuse is of growing concern both across the nation and in Missouri. 4.3% of adults in the Southwest region reported misuse of prescription pain medication over the past year.

Substance Use Consequences in the County

2016 Number of Alcohol-Related Crashes by Severity				2016 Number of People Injured / Killed in Alcohol and Drug-Related Crashes			
Total Crashes	Fatal Crash	Crash w/ Injury	Crash w/ Property Damage	Alcohol Fatalities	Alcohol Injuries	Drug Fatalities	Drug Injuries
8	1	3	4	1	4	0	0

Mental Health Data for Hickory County

Individuals struggling with serious mental illness are at higher risk for homicide, suicide, and accidents as well as chronic conditions including cardiovascular and respiratory diseases and substance use disorders. In state fiscal year 2017, 26 Hickory County residents received treatment for serious mental illness at publicly-funded facilities. See table for details. While there are data on those who receive treatment, data on mental health in the general population is very limited. This is especially true at the local level.

Numbers Served in Hickory County		
	FY2016	FY2017
Total	26	26
Adjustment Disorder	*	*
Anxiety Disorder	14	14
