

Our Voice in MO Redesign

YOUR HELP is needed to redesign a system of supports in Missouri that works for individuals with intellectual & developmental disabilities and their families!

Across the country, developmental disability systems are changing. This is because there is recognition that people with developmental disabilities have the right to live, work, love, worship and play in their communities like other citizens. This requires the system that funds, delivers and oversees the current services and supports to change to meet this need. At the same time, the demand for services is increasing and the amount of dollars to fund the services is decreasing. This means states must redesign their systems to meet these new pressures.

We need you to fill out a survey created to ask individuals with I/DD and their families their opinions about how things are going and ways that the system can be improved. These answers will be compiled and shared with the leadership who is working on the Missouri DDD Redesign.

Fill out the survey and get the details about the listening sessions at ourvoicemoredesign.com

In Missouri, the Division of Developmental Disabilities and the local County boards are currently in the process of figuring out what this new redesigned administration system should look like and they need your help! Listening sessions will be hosted regionally throughout the state to provide an opportunity to hear an overview of the redesign, ask questions, and provide your feedback.
