

Daviess County is located in Western Missouri and had a population of 8,233 in 2016. Daviess County ranks 99 in population size among Missouri's 114 counties plus the city of St. Louis. The 2016 unemployment rate in the county was 4.7%. This was lower than the statewide unemployment rate of 6.6%. In 2016, the poverty rate was 16.9% which was higher than the statewide poverty rate of 14.0%. The median income of the county was \$43,519.

## **Substance Use in Daviess County**

The availability of county-level data on substance use is limited. The Missouri Student Survey convenience sample can provide estimates for youth in most Missouri counties. This survey is administered in even-numbered years to 6th through 12th grade students in participating school districts. Adult data are available at the regional level from the NSDUH. See page 2 for graph.

Alcohol is one of the most common substances used by Missouri youth. In Daviess County, 13.2% youth have used alcohol in the past 30 days. An estimated 36.4% believe that using alcohol presents only 'slight' or 'no risk' of harm. Similarly, approximately 26.9% of youth believe that there is 'slight' or 'no risk' of harm in binge drinking once or twice a week. About 43.1% of youth believe that it would be easy to get alcohol. 45.1% of youth have at least one friend that uses alcohol.

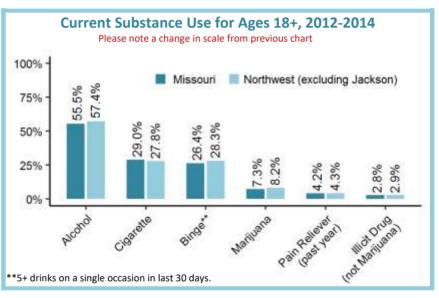

The average age of first alcohol use is 13.2. Among Missouri adults, alcohol is the most commonly used substance. In the Western region, approximately 57.4% of adults currently drink alcohol, and 28.3% have had 5 or more drinks of alcohol on a single occassion in the past 30 days.

**Cigarette** use, in both standard and electronic forms, is of concern across the state. In Daviess County youth, the rate of e-cigarette use is higher than the rate of standard cigarette use. The average age that county youth first use standard cigarettes is 12.7. An estimated 43.1% of youth believe that it would be easy to get standard cigarettes and 37.1% to get e-cigarettes. 32.0% of youth have at least one friend that uses standard cigarettes. An estimated 11.9% of youth believe there is 'slight' or 'no risk' to smoking standard cigarettes, while 33.7% believe there is 'slight' or 'no risk' to smoking e-cigarettes. Most youth obtain cigarettes and e-cigarettes from their friends. In the Western region, 27.9% of adults currently use cigarettes compared to 29% statewide.

**Marijuana** use in Missouri youth continues to be of interest, particularly with recent shifts in legality of adult use across the nation. Around 7.5% of youth and 7.3% of adults report current marijuana use. In Daviess County, 4.0% of youth use marijuana. In 2018, 26.3% of youth said that marijuana is easy to get. Around 85.1% believe that smoking marijuana is wrong, and 25.0% report having at least one friend that uses marijuana. The average age of first use is 14.3. The majority of youth obtain marijuana from their friends, a dealer, or a family member. Across the state, around 46.6% of adults believe there is 'slight' or 'no risk' of harm from smoking marijuana once or twice a week. In Daviess County youth, approximately 29.1% believe that there is 'slight' or 'no risk' of harm from smoking marijuana once or twice a week.

**Prescription drug** misuse is of growing concern both across the nation and in Missouri. In Daviess County, 24.1% of youth believe that it would be easy to get prescription drugs that were not prescribed to them. Most youth

report that there is a risk of harm when misusing prescription drugs, but 11.0% of youth believe that there is 'slight' or 'no risk at all'. About 96.6% of youth believe it would be wrong to use prescription drugs not prescribed to them. Most youth get prescription drugs from a friend or family member. Pain medication is the most commonly misused prescription medication, with 56.3% of those misusing prescription drugs in Daviess County county saying they misuse pain medication. 4.3% of adults in the Western region reported misuse of prescription pain medication over the past year.

## **Substance Use Consequences in the County**

In Western Missouri, 18.8% of those 18 and older had a mental illness in the past year, and 4.5% had a serious mental illness. Serious mental illness is defined as any of the mental disorders asked about and 'these disorders resulted in substantial impairment in carrying out major life activities'.

Approximately 6.8% of Western Missouri residents ages 18+ had at least one major depressive episode in the past year. A major depressive episode is characterized by an extended period of depressed mood, loss of interest or pleasure, and impaired functioning. Typically, females are more likely to report having had a major depressive episode.

Students (6th-12th grade) in the county were asked about their mental health. 73.9% of students in the county reported feeling grouchy or in a bad mood, 56.8% reported feeling sad, 49.4% had changes in sleep, and 51.7% had difficulty concentrating in school at least sometimes. About 13.7% of youth reported self-harm. The most common method of selfharm was cutting, hitting, or scrating oneself. Females were more likely to report self-harm than males.

Suicide is the 2nd leading cause of death for ages 10-34 in Missouri. In 2016, 1 Daviess County residents died by suicide. Typically, white males are most at risk of suicide. Approximately 11.5% of youth had considered suicide in the last year, 8.1% made a plan, and 2.8% actually attempted, resulting in an injury.
