

Past Month Substance Use in Missouri

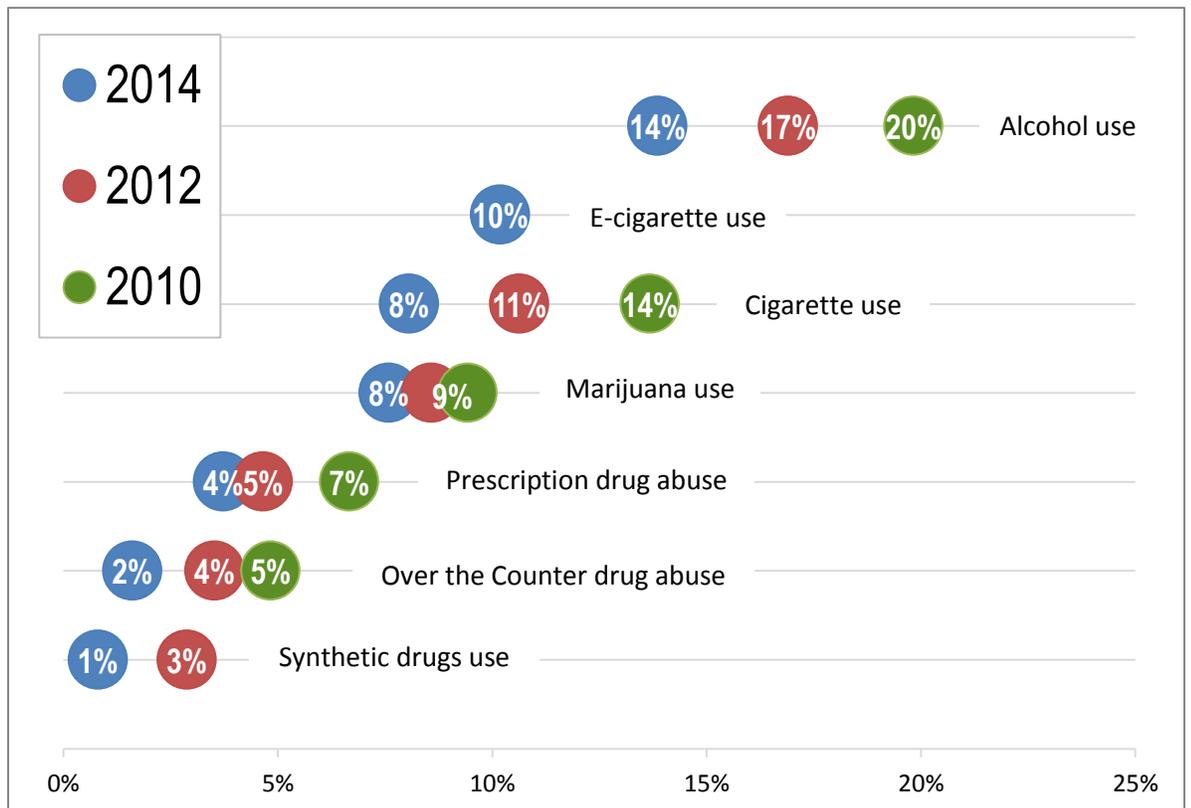

For more information please contact the BHEW at 314-877-5942 or susan.depue@mimh.edu

Reported Past Month substance use has declined over the past three administrations of the Missouri Student Survey¹. Marijuana shows the smallest decline.

Alcohol remains the most common substance reported being used, followed by cigarettes. Marijuana use is approximately the same as cigarette use. Synthetic drug use has declined to approximately 1%.

E-cigarettes were asked about for the first time in 2014. One in ten students reported using e-cigarettes in the past month; this is higher than those who are currently reporting using regular cigarettes.
