Assistive Technology and Independence **Bill's Story**

Assistive Technology services available through all Missouri Developmental Disabilities Waivers include the use of remote support technology which can assist individuals to be more independent and less reliant on staff to be physically present with them at all times. This video produced by Missouri Inclusive Housing Development Corporation (MOHousing) tells Bill's story of achieving greater independence through affordable housing and the use of remote support technology.

The video is located in the What's New section at:
