Citizen-Centered Leadership

The Missouri Chapter of the American Association on Intellectual and Developmental Disabilities is hosting the upcoming workshop, "Citizen-Centered Leadership" with Carol Blessing. Three "Citizen-Centered Leadership" workshop opportunities will be available across the state at the following locations:

[March 7, 2017, St. Louis](#)

[March 8, 2017, Columbia](#)

[March 9, 2017, Independence](#)

Citizen-Centered Leadership™ is concerned with preserving the integrity of landmark advances in the inclusion movement while stepping boldly away from the traditional practices that hold people with disabilities back from full citizenship expression. Carol will take the philosophical foundations of person centered thinking espoused by John O'Brien and Beth Mount and put them into a practical context to learn about people and convert that knowledge into meaningful person centered plans. The workshops will give you new tools to meet the requirements of the HCBS ruling and the new Department of Mental Health ISP guidelines.

For more information about Citizen-Centered Leadership, go to <http://citizencenteredleadership.org/>. To register for the workshops, go to www.moaidd.org.
