Support Coordination Core Competencies Call for Feedback

We Need to Hear From You!

The Division is partnering with stakeholders to review the state support coordination system for any needed enhancements to assist with the provision of quality support coordination. In response to the HCBS Rule, this review will look at the knowledge, skills and standards for person centered planning that promotes a good life for people with developmental disabilities. The Division of Developmental Disabilities (DDD) contracted with UMKC-Institute for Human Development, UCEDD to facilitate this process and collect feedback from an array of stakeholders, including a project advisory group, to guide final recommendations. Members include representatives from DDD, MACDDS, MARF and the DD Council.

We need your feedback by December 29, 2017.

Please review the [Support Coordination Core Competencies](#) document and choose how you want to provide your feedback:
