Benefits Planning Training Event

July 24-25, 2019

As part of its Employment First initiative, the State of Missouri developed a tiered system of benefits planning education to supplement the efforts of the Work Incentives Planning and Assistance (WIPA) projects. Training, technical assistance, and resources are being designed to create a much larger network of professionals to help people understand how work will affect benefits.

Initial training will be provided on July 24th-25th for professionals needing basic foundation information. To learn more about the training and to [register](#), please visit [Benefits Planning Training](#). A detailed description and learning objectives of each of the workshops can be viewed at [Benefits Planning Detailed Descriptions](#).
