ABA Parent Training Plan - Providing Applied Behavior Analysis for Your Child At Home

Relias recognizes parents of children with ASD are facing a new challenge amid the COVID-19 crisis. Between school closures and social distancing requirements, RBTs and BCBAs may not be able to provide ABA services as they normally do.

In response, Relias has developed a new free [ABA Parent Training Plan - Providing Applied Behavior Analysis for Your Child At Home](#). This plan has been designed to help parents feel more confident in their ability to support their children, and provide schools and ABA providers with a resource to share with the families they serve.

The training plan includes:

- * Introduction to Applied Behavior Analysis
- * Imitation and Joint Attention
- * Increasing Behavior
- * Naturalistic Teaching Strategies
