

4/17/20

April is Autism Awareness Month

Missouri Autism Centers Consortium

The Missouri Autism Centers Consortium (MO ACC) is a formalized group of six Autism Centers. These centers are located at Missouri teaching hospitals across the state. These Autism Centers:

- Use, improve upon, and stay abreast of evidence-based and best practices;
- Provide a one-stop shop for families by employing multidisciplinary teams (e.g., medical doctor, clinical psychologist, speech/language pathologist, occupational therapist, behavior analyst, nurse, etc.) with expertise in ASD and have dedicated staff that provide support and resources to families;
- Engage in a continuous quality improvement program;
- Have working relationships and clinical, research, or educational connections with other Missouri Autism Centers; and
- Have educational initiatives that include family, professional, and/or community educational activities.
