

WEBVTT

1

00:00:01.229 --> 00:00:13.198

Started Thank you everyone for joining us today before it turned over the team, there's a few things that I wanted to share with. You. Let me share my screen here.

2

00:00:13.198 --> 00:00:16.588

The 1st thing I wanted to mention to well.

3

00:00:16.588 --> 00:00:20.219

That's not something I want him to share and let me change that up a little.

4

00:00:25.079 --> 00:00:38.969

On the screen that I wanted to share 1st, there were 2 email blast that went out 1. yesterday 1 today I have those those images showing.

5

00:00:38.969 --> 00:00:53.484

A couple of things I want to share as a reminder with those email blast in addition to the content that they provide. Please me sure that if you have the opportunity to share that sign up piece for division email blast that you do that.

6

00:00:53.994 --> 00:01:08.784

We have found that a lot of times, even our own staff, they, they have missed the messages because didn't realize that oh, this, this email blast system isn't just for specific individual. This is for everyone's individual family providers.

7

00:01:09.055 --> 00:01:11.305

Whoever is interested in the information that.

8

00:01:12.060 --> 00:01:22.739

That we share, we want them to sign up for those last. So please feel free to share that far and wide. I will show you when we go over to the landing page, which 1 of those.

9

00:01:22.739 --> 00:01:29.340

Panels on the sculling about that.

10

00:01:29.340 --> 00:01:34.319

A lot of time.

11

00:01:34.319 --> 00:01:46.950

So, what they're okay with those 2 messages in mind the 1st, I wanted to remind you of is.

12

00:01:46.950 --> 00:01:59.280

Station and be, I know that we've put out lots of information about patient Mt, we take it in and then we suddenly needed it and we kind of forgot what was sent out quick reminder.

13

00:01:59.280 --> 00:02:03.180

Station and D, button is located on the main dB landing page.

14

00:02:03.180 --> 00:02:09.569

That information is there, those folks are available 24. 7. you want to.

15

00:02:09.569 --> 00:02:15.000

Guide so directly to the page, it's for me.

16

00:02:18.120 --> 00:02:22.349

I'm not.

17

00:02:27.534 --> 00:02:40.615

All right obviously, I can't take you there today. I don't yes, I can it just opened in a different window. I'm not sure why it's acting that way. Anyway station and D page. You can you can find that information and education section.

18

00:02:41.245 --> 00:02:47.185

Some frequently asked questions, information specific to individuals and families as well as providers.

19

00:02:48.085 --> 00:03:02.514

You click this button that will take you directly to the station empty page. So that in 1 piece of information, I want to remind you have questions about coven, sore throat the cough. What should I say home?

20

00:03:02.514 --> 00:03:15.895

What I need to do any of those things, and you can get locked them guidance about that, too. That button the 2nd piece I wanted to mention this morning is, you will notice a big orange button across the screen that says connection case management system.

21

00:03:16.465 --> 00:03:31.344

That was the other email blast that went out yesterday. Several of you have asked about when that demo would be available. And what do we have in terms of questions and answers on that how do I learn more?

22

00:03:31.495 --> 00:03:45.564

This page is finally live when you click on that page, it takes you to the connection web page here. You're going to find the background on the project. You're going to find the scope you'll see down below that.

23

00:03:45.564 --> 00:03:46.495

There's a link.

24

00:03:46.770 --> 00:03:59.544

There are a couple links with regards to the, there's a status section so that you can step to date and what's going on when and then here's the piece that most folks have been asking for, which is the demo piece.

25

00:03:59.875 --> 00:04:14.305

This is the recording of the demonstration. That was done on the system and there is the Q and a document that is the follow up. So, 1 thing to keep in mind, this page will continue to evolve as we have more information available as we get further into the project.

26

00:04:14.724 --> 00:04:26.935

If there are things along the way that you say, hey, it would be really helpful if this was included, by all means, feel free to drop an email to me, or send it to email. We'll make sure we take a look at that.

27

00:04:26.935 --> 00:04:33.625

See, if we can get that information out there for you, and with that, I am going to turn this over to.

28

00:04:34.499 --> 00:04:38.399

All right Thank you. Hi guys. Good morning. Everyone.

29

00:04:38.694 --> 00:04:48.894

We continue to a battle coded in the state of Missouri today. We've learned that we have exceeded 200000 positive cases of it in the state of Missouri.

30

00:04:48.894 --> 00:05:00.444

Uh, yesterday was our highest, total daily count of cases yet at close to 4000. so those are those are big numbers and those numbers continue to go up.

31

00:05:00.444 --> 00:05:08.574

I know a lot of you have probably seen these articles talking about hospitals are after peak. We are not at this point.

32

00:05:10.738 --> 00:05:23.694

Looking at alternatives to hospitalizations, but there are and that would mean, like, opening alternative hospital sites is what I meant there, but that is an option that state has and can make readily available.

33

00:05:24.233 --> 00:05:37.163

But there are some hospitals that are now reviewing what they will be doing around elective procedures. And I know hospitals are adding some search capacity at this point. So wanted to make sure that every I know that you're reading some articles.

34

00:05:37.194 --> 00:05:42.533

That is what we're getting out of the fusion cell, and that is with the hospital association reporting that information.

35

00:05:43.553 --> 00:05:53.004

For those individuals with developmental disabilities today, have those 200000 positive cases. 764 of those are individuals that we support in our waivers. We've had 17 desks today.

36

00:05:53.004 --> 00:06:06.113

We had and new death added today, and we've got 175 different providers right now that are managing, or have managed to cove it outbreak. We actually have several new providers today.

37

00:06:06.113 --> 00:06:17.994

So I know I said this early on when we were talking about cobit. It's not if it's when, and I think a lot of our folks are seeing that when right now also.

38

00:06:23.608 --> 00:06:32.158

On the testing side and Hi, if you want to go ahead and pull up those community testing resources, thank you.

39

00:06:32.158 --> 00:06:35.399

Before we go into what hike is called up onto the screen.

40

00:06:36.803 --> 00:06:50.274

The division had been supporting community providers with their testing efforts. We were doing that with cares act funding right now we don't know the future of carefax funding and so this.

41

00:06:50.548 --> 00:07:01.913

And that is largely, because we're not sure how the federal government will proceed with terrorist funding. If There'll be another round of funding 1st day, that There'll be some more directed testing funding delivered to the state.

42

00:07:02.363 --> 00:07:14.783

So, as we work through that, the state's ability to fund community provider testing is going to end effective November 15th. We have to have all invoices in November 15th. So really?

43

00:07:14.783 --> 00:07:26.004

Unless you're gonna get an invoice the day, you do testing. Now, if you've done some testing and you're working on, getting those invoices, we can please continue to submit those to us and we will try to work through the process.

44

00:07:26.124 --> 00:07:33.954

But really our cut off date for community testing is probably now, and invoices need to be turned in on November 15th, community provider testing.

45

00:07:34.343 --> 00:07:38.004

That doesn't mean that I've quit and we will like I said,

46

00:07:38.033 --> 00:07:50.754

we will continue to try to find ways to restart that continue that make sure you guys have access to the testing you need if you are a provider in a situation where you are just desperate to get testing,

47

00:07:50.754 --> 00:07:52.524

please reach out to us.

48

00:07:52.524 --> 00:08:03.444

Like, we did early on and we will work to try to figure out solutions for you with that said, though, there are more community testing events across the state now than we've ever had before.

49

00:08:03.444 --> 00:08:14.663

I know that we send this out to you regularly, and we can send this link out to you again. Here's a list of next week's community testing sites. These community testing sites are run. They're free.

50

00:08:14.663 --> 00:08:26.423

You don't have to have a doctor's note you do have to register online. I know we have a lot of folks that take advantage of these, because they've called me and talked to me about how to handle results, but you just register online.

51

00:08:26.423 --> 00:08:38.844

You can get the test done is I've done 2 of them into different locations. It's been a smooth process. We did the testing on both of my kids there for those of you that aren't aware of.

52

00:08:38.844 --> 00:08:49.283

My entire family has tested positive for go of it. We, this is our last day where we will be 10 day recover from the last 2 of us. Today. We are feeling so.

53

00:08:50.548 --> 00:09:03.653

Thank you, but it is, it was, we did not all feel fine. We did have symptoms through the process and some of those symptoms can be very scary. So, so just so, I have experience with this. The, what?

54

00:09:03.653 --> 00:09:08.844

The National Guard does with these test it as a self administered test. So, even my.

55

00:09:09.119 --> 00:09:21.629

10 year olds gave himself a test, and my 11 year old gave himself because they test and they did just fine. So wanted to make sure that you were aware of how that process works, but you do have to register online.

56

00:09:21.629 --> 00:09:32.818

Results do come back relatively quickly so that's 1 of the community testing options because now, hi, if you go to the next link.

57

00:09:33.803 --> 00:09:47.693

Because of the recent increase in coven cases of Missouri, the federal government has also instituted surge testing in the state of Missouri. This is also free testing and it does not require a doctor's note.

58

00:09:48.173 --> 00:09:51.533

If you'll scroll down a little bit hike. These are testing sites.

59

00:09:52.703 --> 00:10:05.153

These testing this testing will occur every week on these dates at these testing sites. So you can see here the testing site details in Columbia, Missouri testing is from 10 to 5.

60

00:10:05.183 --> 00:10:19.524

every Monday at Memorial Baptist church in Branson testing is every Tuesday from 10 to 5 at Cox health in St. Louis testing is every Tuesday and Wednesday from 9 to 5 at affinia healthcare.

61

00:10:19.798 --> 00:10:34.043

In Cape gerardo testing is every Thursday from 10 to 5 that arena park. Lisa Jackson county testing is every Thursday and Friday in Lee summit. So this is search testing that is available.

62

00:10:34.043 --> 00:10:36.203

And these locations every.

63

00:10:36.749 --> 00:10:49.283

On these dates, and we'll be forthcoming the status and give them 30000 tests to administer through this surge testing process. So want to make sure that everybody is aware of these search testing options.

64

00:10:49.283 --> 00:10:58.283

This will we will continue to review this list. And as there are change, made to this list, we will make you aware, but hike if you'll go to the next.

65

00:10:59.333 --> 00:11:11.274

There's a separate link for registration for this testing versus the other testing. We talked about the community testing and so the hike is showing that link link. Right now do I need a coded test?

66

00:11:11.303 --> 00:11:21.323

And this is how you register, and I know that we've had staff that have used this testing option also, and it was relatively simple to use as well. I did not use this 1, but I know I've had staff use this already.

67

00:11:21.803 --> 00:11:29.543

So this is your 2nd testing option, community testing option if you're located close to those areas in the state.

68

00:11:30.264 --> 00:11:43.344

It is, and they, they show you the test locations on here too. You just have to go to the state of Missouri, and they can pull those up for you. So hopefully that is some good information to help you. In the meantime. I also do believe it.

69

00:11:43.344 --> 00:11:46.644

Has gotten a lot easier to contact doctors to get.

70

00:11:47.994 --> 00:12:01.403

Test test authorizations and there are still a large number of testing locations in this state that you can access if you have a doctor's note. So please also pay attention to that information as well. Okay. I guess Thank you.

71

00:12:01.673 --> 00:12:11.484

And I think can post these links and the chat, and I'll also be on our essay queue for everybody. So wanted to make sure that you're aware we're not. And we'll probably push your managing because that's what we do.

72

00:12:11.933 --> 00:12:22.494

So, just just pay attention and we'll make sure you get access to those if you lose them contact us and we'll send them to you again because we do want to make sure that you can access that testing budget update.

73

00:12:22.943 --> 00:12:37.163

We did not get, I don't think the revenue report came out yesterday so I'm not sure where we stand for October, in terms of revenue and there's no additional information at this time. On the budget. They are doing a special session for a supplemental budget.

74

00:12:37.163 --> 00:12:47.754

That does not affect the division, a developmental disabilities at all. So, while that is going on and you may be hearing about it in the news that does not directly affect us or really the Department of mental health.

75

00:12:47.874 --> 00:12:55.374

So, I'm not concerned about that at all carefax funding. So we have the 20M dollars that we got in the budget.

76

00:12:56.698 --> 00:13:01.528

Last year that we've been trying to get spent, we need to have that money also.

77

00:13:01.528 --> 00:13:11.303

Sent by November 15th, we did send a message out to providers that if you get us your information on November, 15 and it's not accurate. We're not going to process your request.

78

00:13:11.303 --> 00:13:20.724

If you get us your information before November 15th, and we've got questions, you've got to get those back to us by November 18th. If that does not happen, we will not process your request.

79

00:13:20.724 --> 00:13:30.563

But we've had a lot of really good luck with providers getting information and just even over the last 2 weeks. We've got 1 more week to get this done. So, please, please, please submit.

80

00:13:30.594 --> 00:13:41.994

This information is what I am saying to you right now is completely foreign, and you don't know what we're talking about. Please reach out to your provider relations staff and your regional offices, and do that immediately.

81

00:13:41.994 --> 00:13:56.484

So that they can help you through this process, but that those dollars are set aside for individual supported, living group homes they have and supported employment. So, I think we've got up to 11M dollars of that funding today.

82

00:13:58.469 --> 00:14:11.759

So that is really good news. Then moving on to vaccinations. We did have an update on vaccinations yesterday in the fusion cell. The most recent information we have sent Missouri.

83

00:14:12.293 --> 00:14:22.823

To not expect any shipment of vaccinations before the middle of December and no vaccinations will be shipped until the CDC issues, the emergency use authorization.

84

00:14:22.823 --> 00:14:36.053

So that's the thing that the CV says these are safe vaccinations to be distributed to the state. So, we so we'd earlier heard that that can be as early as mid October. We're now hearing that that's going to be mid December.

85

00:14:36.264 --> 00:14:47.364

We don't know how many doses will get. We don't know any of that. At this point. We don't know who the supplier is. So, while we keep ourselves as

educated as, we can on that front, I did want to share that information with you as well.

86

00:14:47.724 --> 00:14:58.104

There's a question that I got and it says are residential hesitation provider staff required to where when, when and I, ourselves and group home.

87

00:14:58.494 --> 00:15:08.634

And there is no requirement we don't have I don't have a lot out there that says you must where is the best practice is highly recommended. It is.

88

00:15:08.634 --> 00:15:21.443

How we operate in all of our state operated programs, depending on what level of if you have infection in a group home Mariah. So, if you don't have infection in a group home or a cell, that depends on what level of.

89

00:15:22.254 --> 00:15:35.604

But I will tell you, and all of our homes, we were masks all the time. So, and that's on the state operated side. And I highly recommend that on the community side as well. I know it's exhausting but.

90

00:15:36.538 --> 00:15:46.019

But, yes, we do highly, highly recommend that and that's all I've got on my list. So I am going to go on mute and turn it over to Angie.

91

00:15:58.589 --> 00:16:05.099

Anthony, we cannot hear you. Sorry? I thought I'd double unmuted myself. Can you hear me now?

92

00:16:06.599 --> 00:16:12.599

Yes. Okay. Perfect. Okay. So we do have an update on our estimates. Cisco.

93

00:16:14.063 --> 00:16:28.913

Vendor contract has been awarded and it will be fully implemented by April 1st of 2021 and we will be sending out formal notifications to all of our self directed individuals designated representatives and support coordinators by the end of this month.

94

00:16:28.913 --> 00:16:35.903

And that letter will detail the transition timeline and planning as well as providing a link to the new FMS vendor website.

95

00:16:38.813 --> 00:16:48.053

So be watching for that, and then I'm going to go ahead and get some updates on our federal programs unit in regards to waivers as many of you should have seen.

96

00:16:48.053 --> 00:16:54.293

We sent out an email blast, letting, you know, that approved our most recent appendix case submission.

97

00:16:54.293 --> 00:17:05.273

They approved that on October, 2009, and that appendix case submission was to reduce the unduplicated participants served and then to temporarily modify the provider qualifications for the a waiver services.

98

00:17:05.273 --> 00:17:05.483

So,

99

00:17:05.483 --> 00:17:13.614

what that means is really that allows to register behavior technicians that are unable to test due to coven related enclosures,

100

00:17:13.614 --> 00:17:16.013

test center closures,

101

00:17:16.493 --> 00:17:22.314

or delays and those tests to still operate under the supervision license behavior,

102

00:17:22.314 --> 00:17:24.743

analyst or license psychologist.

103

00:17:26.638 --> 00:17:31.679

And that appendix K approval has been posted to our website.

104

00:17:32.064 --> 00:17:46.703

And then, Additionally, you've seen the waiver minutes that we've been working on with the, the reduction of the unduplicated participant served, and the removal of the person centered strategies and counseling those have been submitted to CMS. And they are reviewing those.

105

00:17:46.703 --> 00:17:48.953

We'll have our 1st call with them next week.

106

00:17:49.794 --> 00:18:02.604

And then our renewal for comprehensive and community support waivers are currently under review at the health net administration level, and should be posted fairly soon for 30 day public comments.

107

00:18:02.604 --> 00:18:16.824

So, thank you all for the comments that you've submitted to us informally and formally just working through all of those, those processes with them and us and renewals. I know. It gets confusing with just the timelines on how we have to submit those.

108

00:18:16.824 --> 00:18:21.713

So, thank you for those and with that, I will turn it over to windy.

109

00:18:26.249 --> 00:18:29.398

Good morning. Can you hear me?

110

00:18:29.398 --> 00:18:32.999

Yes.

111

00:18:32.999 --> 00:18:47.874

Okay, 1 thing I just wanted to follow up in 2 val's information on that cares act update or the provider. Really? Funding actually, is that we have a centralized and pulling up my email now.

112

00:18:48.148 --> 00:18:51.388

A centralized email.

113

00:18:51.388 --> 00:18:54.419

Notification or requests.

114

00:18:54.419 --> 00:19:00.449

Portal centralized email to, to submit those requests.

115

00:19:00.449 --> 00:19:14.423

Effective November, 12, that email was sent out yesterday and so look for that email. If you didn't get it yesterday or reach out to provide a relation staff at your regional office. Let me just read what wander wrote.

116

00:19:14.423 --> 00:19:18.443

So, I don't stumble around as of November, 12 at 4 PM. All requests.

117

00:19:18.898 --> 00:19:25.169

Already submitted through a centralized email list that notification and the address was distributed yesterday.

118

00:19:25.169 --> 00:19:28.439

From that point forward the 15th.

119

00:19:28.439 --> 00:19:33.269

Until the 15th all reviews we conducted by a centralized team.

120

00:19:33.269 --> 00:19:38.878

And you'll receive communication from a state employee, not previously had contact.

121

00:19:38.878 --> 00:19:50.249

If he's not had previously contracted with, so, if you are, if you have not received that email, you have questions about that, as Val said, please reach out to your PR.

122

00:19:50.249 --> 00:20:00.388

Staff at your local regional office I just wanted to touch base quickly on the statewide remote monitoring. We right now have all counties on.

123

00:20:00.388 --> 00:20:04.798

A remote monitoring status that does not mean.

124

00:20:04.798 --> 00:20:11.818

That those pcms or those support coordinators cannot go out and do a.

125

00:20:11.818 --> 00:20:23.249

Uh, just face to face visit if they are comfortable in doing that, and they feel equipped and have the means to do that. They can certainly go ahead and do that. And certainly if there's any.

126

00:20:23.249 --> 00:20:32.429

Health and safety issue or concern they need to and are required to do that face to face visit some providers that wondered if that also applies to them.

127

00:20:32.429 --> 00:20:38.578

This is just some providers have been using this as a guide post about how.

128

00:20:38.578 --> 00:20:44.249

Um, involved to be in the community perhaps and this is not any mandate.

129

00:20:44.249 --> 00:20:52.618

On providers of other services, it's not a mandate on our TCM providers. Either is just a pretty much a status.

130

00:20:52.618 --> 00:21:03.719

Updates so providers of other services day, have, if you're doing the integration and other such services, just use that as information as you.

131

00:21:03.719 --> 00:21:07.288

Um, decide how to move forward with programming.

132

00:21:07.733 --> 00:21:09.923

A couple questions that have come in,

133

00:21:10.223 --> 00:21:14.064

there was a question around funding medical equipment for families right now,

134

00:21:14.064 --> 00:21:18.473

the division does not have any resources to help family,

135

00:21:18.503 --> 00:21:19.703

individual families,

136

00:21:20.124 --> 00:21:21.743

purchase medical equipment,

137

00:21:22.973 --> 00:21:25.253

but you might reach out to.

138

00:21:25.558 --> 00:21:33.324

Your Senate bill, 40 board, and ask if they have resources to help or if they know of other resources locally, that can help.

139

00:21:33.594 --> 00:21:42.864

You might also reach out to your a provider in your area because there are some businesses that do have.

140

00:21:43.763 --> 00:21:58.403

Community support grants that they work with. For example, I know that Cerner in Kansas City has a granting process that is only open to families and individuals who are working to get over a hump or have some.

141

00:21:58.709 --> 00:22:11.608

They come up in their lives that has kind of set them back. They do not grant it to agencies. They grant to individuals and families so you might reach out to any of your provider.

142

00:22:11.608 --> 00:22:20.608

Your providers in the area who do fundraising that they may also know of any of those local resources for, for, you.

143

00:22:20.608 --> 00:22:29.638

So hope that helps for some of those families if, if we end up with some money down the road, that we're able to repurpose for these.

144

00:22:29.638 --> 00:22:38.669

Resources will be certain to let, you know, there's also a question that Chad about flexibility and some information that Kyla.

145

00:22:38.669 --> 00:22:47.219

Had sent out prior, so I don't know the details of of that information, but we will follow up on that.

146

00:22:47.219 --> 00:22:51.568

And put it in the question and answer documents so that you have those details.

147

00:22:51.568 --> 00:22:54.689

So look to the question and answer documents for that.

148

00:22:54.689 --> 00:22:58.288

And with that, that is all I have, I.

149

00:22:58.288 --> 00:23:03.449

Kim, I don't know if you're Mike is working, or if you add anything to add.

150

00:23:03.449 --> 00:23:11.699

Last I heard her Mike was not working, so I think now we can go to questions Val. Are there any other questions that have come up in the chat?

151

00:23:12.959 --> 00:23:19.288

I know there's a question that came up about reliance that before we get off the call hype if you'd be able to speak to that.

152

00:23:20.273 --> 00:23:34.913

There's 1 last question, Wendy, and that's the bad in regards to monitoring it says in person activities must be outdoors. Are we, as TCM able to do indoor socially distance are required to be outdoors for any in person activity. The answer is, you can do indoor monitoring.

153

00:23:34.913 --> 00:23:49.104

It's not we're not saying you have to only do outdoor monitoring, but that needs to be a decision that's made between the support coordinator the family, the provider, the individual. So there's there's a lot of things that need to be taken into account.

154

00:23:49.134 --> 00:24:03.594

I totally think that indoor monitoring can be done safely as long as you're wearing your mask for following the rules don't touch. A lot of stuff don't send 10 people into a house. Those kinds of things, but again, it needs to be the decision of everybody involved. So.

155

00:24:04.528 --> 00:24:15.148

I hope that answers that question and if somebody wants to say something different on that, please feel free to. There's another question. Is there a date for tools training on rely a s**.

156

00:24:15.148 --> 00:24:19.108

I can answer that. All right. Thanks.

157

00:24:19.108 --> 00:24:30.683

Um, I met with project manager again this morning, our, our tentative launch date for having tools of choice, training available in the content. Self registration portal is January 1.

158

00:24:31.314 --> 00:24:36.114

so that all of those files are with the developer now, and they are building the package.

159

00:24:36.114 --> 00:24:36.413

So,

160

00:24:36.413 --> 00:24:37.884

we should be set for them,

161

00:24:38.604 --> 00:24:44.064

we will be sending out an email blast when those things are available and the process,

162

00:24:44.334 --> 00:24:54.564

which is a nice Segway into the question about how to access those reliable portals best way to do this is to go to our division landing page.

163

00:24:55.199 --> 00:25:04.378

So, if you even just go to damage that mobile dev, click on the developmental disabilities, that will get you to this page community support.

164

00:25:04.378 --> 00:25:13.973

Education and learning, when you get here, this is your 1 stop shop for everything you need to know about reliable. There are 2 self registration portals that we have.

165

00:25:14.243 --> 00:25:14.693

1,

166

00:25:14.693 --> 00:25:15.054

the 1st,

167

00:25:15.054 --> 00:25:16.854

1 listed as employments employment,

168

00:25:16.854 --> 00:25:17.273

support,

169

00:25:17.273 --> 00:25:17.544

self,

170

00:25:17.544 --> 00:25:18.653

registration portal,

171

00:25:19.013 --> 00:25:33.263

that houses 30 courses that will meet the requirements for individuals that need to have employment support training to meet the contract piece on the 2nd portal the DB content self registration portal.

172

00:25:34.134 --> 00:25:42.503

That houses primarily are created content that would be abuse and neglect. That would be nursing delegation.

173

00:25:42.713 --> 00:25:53.423

It also houses the 3 refresher courses for 1st day med aid and CPR it houses the test for level 1 med administration.

174

00:25:54.173 --> 00:26:08.124

If you forget which 1 is with what you're looking for, by all means, go to this page, it tells you how to access it'll link you to the portal, what you need to do to get certificates telling you like okay, fine.

175

00:26:08.124 --> 00:26:09.624

All of this, I still need help.

176

00:26:09.898 --> 00:26:14.969

Drop an email to the email at stop no, that stuff.

177

00:26:14.969 --> 00:26:18.058

And when you will get back with you and help walk you through that.

178

00:26:18.058 --> 00:26:22.199

Hi guys, can you back up 1?

179

00:26:22.199 --> 00:26:25.318

And show how you got to this page right here.

180

00:26:25.318 --> 00:26:35.608

Absolutely, so this is our main DD landing page. This is an access point into various different.

181

00:26:35.608 --> 00:26:40.019

Areas you go down below to the popular sections.

182

00:26:40.019 --> 00:26:50.038

There's 1 called community support when you click on that tab, just so you have several choices there. 1 of those is education and learning.

183

00:26:50.213 --> 00:27:03.384

On education and learning page is where you find this 2nd, according that has relies self registration portal we also have an event slash training calendar that you may want to check out and some other things going on there.

184

00:27:03.384 --> 00:27:06.804

So, by all means, check out anything and everything while you're there.

185

00:27:08.729 --> 00:27:13.019

Thanks you're welcome.

186

00:27:15.479 --> 00:27:25.229

All right, I think that's all we have today. There's no more questions in the chat. At this point. Thank you for everything. You guys are doing.

187

00:27:25.824 --> 00:27:32.604

It's not getting any easier. It's hard to stay vigilant, especially with the holidays approaching.

188

00:27:32.993 --> 00:27:45.473

But what we're seeing mostly now, in the state of Missouri is community transmission from small family group, gathering weddings, unions, those kinds of things.

189

00:27:45.503 --> 00:27:59.634

So just just be safe, because just 3rd of not being safe convene your whole family has or someone that we support has coven and we want to do everything we can to avoid that.

190

00:27:59.634 --> 00:28:10.523

So, keep me vigilant and good luck enjoy the this beautiful fall weekend. We're getting ready to have and we will talk again in 2 weeks. Thanks. Bye.
