supports and services
THAT FOSTER self-determination.

12/20/22

Health Care Careers Day

February 24, 2023

9:00 - 12:30

Virtual Event

The COVID-19 pandemic created a critical shortage of health care professionals across the state. Yet, many of today's youth are uncertain on the great career pathways in the industry. The Missouri Chamber of Commerce, Missouri Hospital Association and the Missouri Department of Education have created an opportunity for school age youth and out of school youth to get a chance to learn from a variety of health care professionals during a livestream event. Every 20 minutes a new health care provider will feature a career pathway and engage in live Q&A with students.

Both K-12 and higher education students and school groups can register free of charge, to see inside various occupational pathways, learn about the future of health care and virtually engage directly with professionals from some of the best health care centers around the state.
