Federal Communications Commission (FCC) Affordable Connectivity Program

The FCC has launched a new landing page at [GetInternet.gov](https://www.fcc.gov/GetInternet) for its Affordable Connectivity Program. [AffordableConnectivity.gov](https://www.fcc.gov/AffordableConnectivity) will still exist as a resource for consumers and digital navigators with more detailed information about the program. The FCC is continuing its efforts to promote the program by providing grants to community partners, supporting navigators who help eligible consumers enroll, and developing media strategies to increase public awareness.

For questions regarding this update to the Affordable Connectivity Program, please contact Jamile Kadre at Jamile.Kadre@fcc.gov.
