

WEBVTT

1

00:00:00.000 --> 00:00:03.660

Go ahead Holly.

2

00:00:03.660 --> 00:00:09.460

Good afternoon. Everyone welcome to this month edition of are you at lunch? In line? Just as a reminder you.

3

00:00:07.660 --> 00:00:13.960

Just as a reminder you that means universal design and assistive technology and Shelly and I have.

4

00:00:12.260 --> 00:00:18.570

And Shelly, and I have a special guest today. I'll let our panelists introduce themselves.

5

00:00:18.570 --> 00:00:26.890

I am Shelley brown. I'm with you. Dad team.

6

00:00:25.690 --> 00:00:29.490

The dat team and I work specifically with the.

7

00:00:29.090 --> 00:00:32.940

Service and serve, as the state lead for that service definition.

8

00:00:32.940 --> 00:00:47.150

Hi, everyone, I'm Leslie Bradley. I am a special assistant official with the federal programs unit and division of DD and I appreciate Shelley and Holly having me today and.

9

00:00:45.630 --> 00:00:54.810

And I apologize the, that team lead for assistive technology across the state in today's presentation where you're.

10

00:00:52.150 --> 00:00:56.760

The state and today's presentation where you're going to talk about the difference between.

11

00:00:56.760 --> 00:01:02.070

Or whole modification services most of us know it.

12

00:01:02.070 --> 00:01:08.230

Specialized medical equipment also known as and assistive technology. Now we're.

13

00:01:05.610 --> 00:01:08.830

And assistive technology, now we're going to be.

14

00:01:08.830 --> 00:01:12.890

Seeing those 3 acronyms a lot. So we're going to say.

15

00:01:12.890 --> 00:01:15.930

A lot, but what we mean is.

16

00:01:15.930 --> 00:01:21.280

Specialized medical equipment, we're going to be using the acronym E for all home and.

17

00:01:20.090 --> 00:01:24.510

For all home and vehicle modification conversation and we're going to be using.

18

00:01:23.310 --> 00:01:30.360

And we're going to be using 80 to refer to assistive technology. Now, there may be some other acronyms that get talked.

19

00:01:27.420 --> 00:01:31.200

Now, there may be some other acronyms that get tossed out.

20

00:01:31.200 --> 00:01:35.000

If you don't know what those are, go ahead and drop them in the chat. So we know.

21

00:01:35.000 --> 00:01:38.850

To circle back and redefine that. Of course.

22

00:01:38.850 --> 00:01:45.220

You guys might also hear some more typical acronyms throughout the programs such as an, which is our individualized.

23

00:01:42.300 --> 00:01:45.480

Programs such as an isb, which is our individualized service.

24

00:01:45.480 --> 00:01:51.390

Plan our individualized support plan and see, which is our support coordination.

25

00:01:51.390 --> 00:01:57.860

We're gonna start with some definitions, so.

26

00:01:57.060 --> 00:02:01.150

So, Kelly. Okay. So, um, as you can see.

27

00:02:01.150 --> 00:02:06.360

Listed is the waiver definition that you would find in the waiver manual for. And rather than.

28

00:02:05.760 --> 00:02:12.640

And rather than going through that word for word, just to give you a summary of what that definition includes is to define the.

29

00:02:11.039 --> 00:02:16.040

Is to define the or home modification vehicle. Modification is any physical or.

30

00:02:15.440 --> 00:02:22.550

Physical adaption to the home or vehicle that enables the individual to function function with greater independence. So, some of these.

31

00:02:21.340 --> 00:02:27.130

So some of these adaptations in the home could include things of the installation of a ram grab bars.

32

00:02:26.130 --> 00:02:32.600

Um, grab bars, maybe the widening of doors, modification of bathroom facilities, or, um, installation.

33

00:02:29.730 --> 00:02:33.210

Bathroom facilities or installation of.

34

00:02:33.210 --> 00:02:36.900

Of specialized electric, we're plumbing in order to.

35

00:02:36.900 --> 00:02:42.980

Ensure that the necessary medical equipment is working for the individual when it comes to.

36

00:02:40.620 --> 00:02:44.670

Um, when it comes to vehicles, we may.

37

00:02:44.670 --> 00:02:50.480

That are done exactly to the vehicle in order to allow for greater independence. Um, but some things that.

38

00:02:49.080 --> 00:02:54.280

Um, but some things that would not be included in this definition would be, um, repairs to a home.

39

00:02:52.480 --> 00:02:56.400

Would be repairs to a home repairs to a vehicles.

40

00:02:56.400 --> 00:03:03.600

Or, perhaps square footage added to a home, um, or even some other features of the homes such as the, um.

41

00:03:03.600 --> 00:03:11.290

Age back or outside work that may need to be done to the homes. Those would not be included in our. So it's really important.

42

00:03:10.100 --> 00:03:15.300

So, it's really important that any time you're evaluating home modification or vehicle modification.

43

00:03:15.300 --> 00:03:21.240

That you're truly looking at the physical adaptations that are needed to make that home accessible for that individual.

44

00:03:33.955 --> 00:03:36.415

I'll take specialized medical equipment.

45

00:03:36.690 --> 00:03:44.190

So, like Shelly said, I'm not going to read the definition that you have there in front of you, but it does include devices controls or appliances.

46

00:03:44.190 --> 00:03:50.190

Specified in the support plan, which enable individuals to increase their abilities to perform or to proceed.

47

00:03:50.190 --> 00:03:54.540

Perceive control, or communicate with the environment in which they live.

48

00:03:54.540 --> 00:04:00.570

And 1 thing I did want to point out, which this information is contained in the BD waivers manual.

49

00:04:00.570 --> 00:04:04.620

And we get a lot of questions about this so I know it does get confusing.

50

00:04:04.620 --> 00:04:10.110

But in content supplies are included, however, incontinence supplies for children's.

51

00:04:10.110 --> 00:04:13.320

Children age 4 to 20 with disabilities or specials.

52

00:04:13.320 --> 00:04:17.370

Special healthcare needs are covered under the mental health net.

53

00:04:17.370 --> 00:04:23.130

Through the early and periodic screening diagnostic and treatment or program.

54

00:04:23.130 --> 00:04:28.620

And continent supplies for individuals, 21 and over are covered through the MO, health net exceptions.

55

00:04:28.620 --> 00:04:36.060

Process excluding participants of the community support.

56

00:04:36.060 --> 00:04:42.480

And then any items reimburse with waver funds through SMS shall be in addition to any medical equipment.

57

00:04:42.480 --> 00:04:50.010

And supplies furnished under the state plan, and she'll exclude those items, which are not a direct medical or remedial benefit to the individuals.

58

00:04:50.010 --> 00:04:58.230

So real important to make sure that is not covered under Medicaid state, durable medical equipment or plan 1st.

59

00:04:58.230 --> 00:05:02.260

Great Thank you.

60

00:05:01.410 --> 00:05:05.210

Um, 80 assistive technology is a device.

61

00:05:04.610 --> 00:05:07.730

Is a device a product it can be off the shelf.

62

00:05:07.730 --> 00:05:13.110

It can be created directly for an, for an individual. It does include at.

63

00:05:11.310 --> 00:05:14.880

It does include at this time, our remote support.

64

00:05:14.880 --> 00:05:20.430

Services and Kenny work, the idea behind the is that it works in conjunction.

65

00:05:19.030 --> 00:05:26.910

That it works in conjunction with other services are standalone to help increase independent participation in the community.

66

00:05:26.910 --> 00:05:30.880

And, uh, employments, there are 4.

67

00:05:30.280 --> 00:05:35.370

Are 4 areas of assistive technology underneath the waiver definition?

68

00:05:34.770 --> 00:05:41.490

Definition and they include the actual equipment assistive technology service consultation.

69

00:05:38.670 --> 00:05:45.690

The system, technology, service, consultation and education.

70

00:05:45.690 --> 00:05:50.850

This is a kind of a.

71

00:05:49.050 --> 00:05:52.650

This is a, uh, kind of a breakdown slide between the 3.

72

00:05:52.650 --> 00:05:55.860

Kind of give a quick and dirty.

73

00:05:55.860 --> 00:06:05.120

So, I'll start with this 1. um, so I'm talking and we're going right to left on this slide here. Um, so supports the individual to gain or maintain.

74

00:06:02.520 --> 00:06:06.320

So supports the individual to gain or maintain their independence and their.

75

00:06:06.320 --> 00:06:10.140

Community in the employment Arthur transportation.

76

00:06:10.140 --> 00:06:15.170

There is professional consultation required, um, available and.

77

00:06:14.770 --> 00:06:23.360

And a risk assessment is needed, um, consultation is part of the service definition and can be.

78

00:06:20.550 --> 00:06:23.560

Definition and can be, uh.

79

00:06:23.560 --> 00:06:29.320

That's a standalone or can be part of their remote support services and it does have an annual.

80

00:06:27.720 --> 00:06:33.760

And it does have an annual cap of 9,000 dollars. So if you're looking at remote support services, they should.

81

00:06:30.920 --> 00:06:37.620

Looking at remote support services, they should all fit under 9,000 dollars, but we know we might need an exception for them.

82

00:06:37.620 --> 00:06:40.770

Hello.

83

00:06:40.770 --> 00:06:48.840

And as we discussed with, it supports the activities of daily living and instrumental.

84

00:06:48.840 --> 00:06:55.290

It does require a therapist evaluation, and those evaluations are available through the telehealth.

85

00:06:55.290 --> 00:07:05.040

It does have a cost limit of 7,500 per year per individual and that correlates to the waiver year, which is July 1 through June 30th of each year.

86

00:07:05.040 --> 00:07:09.540

And then there is also the exception process that you needs, cannot be met.

87

00:07:09.540 --> 00:07:14.820

Then there is an exception process, which is outlined in the waiver manual and waiver application.

88

00:07:19.280 --> 00:07:24.150

A service follows along some of those same parameters as that. It also is.

89

00:07:24.150 --> 00:07:30.330

Going to require a therapist evaluation, and those evaluations can be done through telehealth. It also has a 70.

90

00:07:29.130 --> 00:07:42.530

Um, it also has a 7,500.

91

00:07:41.130 --> 00:07:45.990

It is important to remember.

92

00:07:44.790 --> 00:07:51.960

The evaluation is assumed in the cost of 10,000 dollars. So, for instance, if you did receive an exception limit.

93

00:07:50.160 --> 00:07:56.580

If you did receive an exception limit up to 10,000 dollars, and you have a 500 dollars evaluation.

94

00:07:56.580 --> 00:08:00.930

You now have 9,500 dollars to work with your home modification.

95

00:08:00.930 --> 00:08:04.590

So, it's important to keep that in mind to, as your overall costs.

96

00:08:04.590 --> 00:08:12.450

So here are a few resources to keep in mind.

97

00:08:12.450 --> 00:08:16.770

As you're working through the planning process.

98

00:08:16.770 --> 00:08:21.990

Um, and deciding you looking at what outcomes are needed and what.

99

00:08:21.990 --> 00:08:26.970

Service definitions, best fit the individuals need an outcome and.

100

00:08:26.970 --> 00:08:31.150

These are available on our.

101

00:08:30.150 --> 00:08:37.429

Available on our website, and they can be found in the support coordination manual.

102

00:08:34.470 --> 00:08:41.280

In the support coordination manual at the specialized medical equipment and supply.

103

00:08:38.400 --> 00:08:46.130

The specialized medical equipment and supplies, and are just general labor manual. We.

104

00:08:43.320 --> 00:08:47.130

We do have the information.

105

00:08:47.130 --> 00:08:50.370

Available on our website underplanting.

106

00:08:50.370 --> 00:08:56.830

And development tools and resources here you will find.

107

00:08:54.370 --> 00:08:57.430

Here you will find all the information.

108

00:08:57.430 --> 00:09:04.120

About EPA, there's a flowchart, there's a getting started tool guide. It's pretty much anything.

109

00:09:02.280 --> 00:09:06.270

Pretty much anything you possibly would want.

110

00:09:06.270 --> 00:09:15.910

Um, to get you moving in the process, there's also the assistive technology risk assessment tool there and then we have a technology.

111

00:09:13.110 --> 00:09:16.710

And then we have a technology 1st page that includes some more information.

112

00:09:16.710 --> 00:09:23.820

Our remote supports and our assistive technology, and also includes a provider directory of our providers.

113

00:09:23.820 --> 00:09:28.090

Um, and then this is the durable medical equipment manual.

114

00:09:26.890 --> 00:09:33.720

Equipment manual, which is a great place as Leslie had mentioned earlier to ensure that those products.

115

00:09:33.720 --> 00:09:38.070

Are not going to be covered under the durable medical.

116

00:09:38.070 --> 00:09:43.290

So, when is.

117

00:09:43.290 --> 00:09:48.030

And 80 always.

118

00:09:48.030 --> 00:09:53.260

And 80, each service has a bit of a new 1.

119

00:09:51.660 --> 00:09:57.710

Each service has a bit of a nuance to it and there may feel like there's overlap between them, but.

120

00:09:55.040 --> 00:10:01.190

There's overlap between them, but through planning and understanding what the outcome is, it is very.

121

00:09:58.710 --> 00:10:02.370

Standing with outcome is it is very important.

122

00:10:02.370 --> 00:10:07.260

Um, in determining which service is the best support for the individual's life goals.

123

00:10:07.260 --> 00:10:10.260

Sometimes the path is straightforward and it's easy to choose.

124

00:10:10.260 --> 00:10:14.450

Service best fits outcome and sometimes, you.

125

00:10:14.250 --> 00:10:17.640

You need to really consider and think about it.

126

00:10:17.640 --> 00:10:24.450

Of course, for s. M Leslie is our, um, subject matter expert on that for.

127

00:10:23.190 --> 00:10:27.810

And for you can always reach out to the team.

128

00:10:27.810 --> 00:10:30.870

Um, and a lot of times.

129

00:10:30.870 --> 00:10:34.980

An, can also help.

130

00:10:34.980 --> 00:10:44.530

With that, and there is a assistive technology consultation that can support the team in making those decisions as well. So.

131

00:10:41.580 --> 00:10:44.610

The team in making those decisions as well. So.

132

00:10:44.610 --> 00:10:49.680

Shelley, will you tell us a little bit about the.

133

00:10:49.680 --> 00:10:54.150

Sure, so as we talked about.

134

00:10:54.150 --> 00:10:59.130

Is going to be specific.

135

00:10:59.130 --> 00:11:04.070

Um, so those examples that we've listed here include bathroom modifications, um, you know, so.

136

00:11:02.330 --> 00:11:09.150

Locations sometimes these need to be very specific in regards to what type of shower insert may be needed.

137

00:11:09.150 --> 00:11:17.350

Um, is it whitening of doorways? Is it positioning of different features such as the sync and the vanity? Um, so we can also.

138

00:11:15.550 --> 00:11:24.150

So, we can also see where there's widening of doorways, maybe for a wheelchair use and that may need to be instrumental throughout the home. And even examples.

139

00:11:22.750 --> 00:11:29.640

Um, and even examples are in the lower cabinets in order to be able to access the countertops. Um, and.

140

00:11:29.640 --> 00:11:34.330

And access those cabinets with, um, greater accessibility. So.

141

00:11:33.330 --> 00:11:38.030

So is really going to be focused on an accessibility issue.

142

00:11:36.930 --> 00:11:41.820

The issue and it's whereas some of the other features will be.

143

00:11:41.820 --> 00:11:48.360

We'll we'll go into detail, but may not necessarily involve a modification of the actual physical structure.

144

00:11:48.360 --> 00:11:51.930

Great.

145

00:11:51.930 --> 00:11:59.260

Leslie, can you tell us a little bit more about and when is always kind of a black and white.

146

00:11:56.360 --> 00:12:00.120

Always kind of a black and white.

147

00:12:00.120 --> 00:12:07.890

Yeah, so what you have here is incontinent supports, which we already discussed. And, like I said, I know we get a lot of questions, but it's.

148

00:12:07.890 --> 00:12:14.490

Very straight forward in the waiver manual how that is lined out and how that can be covered under the waiver.

149

00:12:14.490 --> 00:12:21.420

And as you said earlier, Holly, there is a section in the MO, health net manual.

150

00:12:21.420 --> 00:12:27.270

On page, 2 and 19, that states what items? No, health net or state plan will never cover.

151

00:12:27.270 --> 00:12:32.430

So, um, and I believe car seats is 1 of those. So that could be an, that would be covered.

152

00:12:32.430 --> 00:12:35.490

Under the waiver standards.

153

00:12:35.490 --> 00:12:38.880

We also worked with Mo health and we'll get to this in a moment.

154

00:12:38.880 --> 00:12:45.120

Um, to develop tables to assist, um, when you're looking at, should this be an.

155

00:12:45.120 --> 00:12:51.390

And making sure that it's not covered under the MO, health net or durable medical equipment program.

156

00:12:51.390 --> 00:12:56.400

Or the no health and exceptions process or even the mental health net pharmacy programs. So.

157

00:12:56.400 --> 00:13:05.620

So very important to make sure that we're utilizing an exhausting.

158

00:13:02.970 --> 00:13:07.280

Wonderful, thank you. Some things to think about.

159

00:13:07.280 --> 00:13:12.780

For our system technology, of course, remote supports is assistive technology at this time.

160

00:13:12.780 --> 00:13:18.050

Um, communication.

161

00:13:15.790 --> 00:13:18.850

Systems and any applications that and.

162

00:13:18.850 --> 00:13:25.380

It might need to be added to their tablet or device.

163

00:13:25.380 --> 00:13:30.450

I'm going to let Shelly and.

164

00:13:29.250 --> 00:13:32.850

Shelley and Leslie, talk about our decision tree.

165

00:13:32.450 --> 00:13:38.490

Free as this is more specific to some of those.

166

00:13:38.490 --> 00:13:46.800

Uh, perceived overlaps between and services sometimes this.

167

00:13:44.130 --> 00:13:51.200

Sometimes this is where there could be some confusion as to which way to go and so this decision.

168

00:13:50.400 --> 00:13:54.360

This decision tree is just a little reminder to help you navigate through those.

169

00:13:54.360 --> 00:14:00.410

Um, through the questions to determine which which service definition to go with. So, are they going to be permanent.

170

00:13:58.410 --> 00:14:02.130

So, are they going to be permanent changes to the environment if you.

171

00:14:01.410 --> 00:14:06.370

If, yes, that is exact that goes directly to if no, then you would.

172

00:14:05.370 --> 00:14:14.940

If no, then you would want to ask the question is this item portable or removable without specialized professional services or environmental repairs and then you can see as a result of that.

173

00:14:14.940 --> 00:14:18.740

Question which way you would go, um, for, um, we have.

174

00:14:17.940 --> 00:14:26.540

Um, we have this old saying that if you were to shake the house, and it could fall out that possibly that would be considered portable. And and that still stands true today. But we have also.

175

00:14:24.140 --> 00:14:30.570

And that still stands true today, but we've also added some additional thinking or different questioning in there too.

176

00:14:30.570 --> 00:14:34.870

That without professional services or environmental repairs, if this is.

177

00:14:34.470 --> 00:14:40.150

This is something that requires professional installation. This is something that needs to be attached to the home in some way.

178

00:14:39.550 --> 00:14:48.330

In some way.

179

00:14:48.330 --> 00:14:51.870

Thanks Shelley. So.

180

00:14:51.870 --> 00:14:55.590

Like you said, if it's if it's a.

181

00:14:55.590 --> 00:15:01.200

Um, without.

182

00:15:01.200 --> 00:15:05.430

Um, if that's yes, then that would be clearly, um.

183

00:15:05.430 --> 00:15:09.840

So, I, I agree with everything that you said, Shelly.

184

00:15:09.840 --> 00:15:14.070

And just trying to look at it from, from that point of view.

185

00:15:14.070 --> 00:15:18.870

I don't think I have anything else to add to that. Wonderful.

186

00:15:18.870 --> 00:15:23.490

Um, we made a kind of a.

187

00:15:22.290 --> 00:15:26.710

We made kind of a a quick start guide for.

188

00:15:25.320 --> 00:15:33.080

Um, for the planning team, so they can kind of think in ways of.

189

00:15:30.120 --> 00:15:33.480

In ways of when this.

190

00:15:33.480 --> 00:15:41.620

Might just be an easy 1 when you might have to pull in that decision tree. So.

191

00:15:39.510 --> 00:15:44.930

So, some, some basic ones for assistive technology.

192

00:15:43.530 --> 00:15:49.630

For assistive, technology, environmental control systems um, if you have an individual who.

193

00:15:47.430 --> 00:15:51.320

Um, if you have an individual who would like to have control over it.

194

00:15:50.520 --> 00:15:56.550

Control over their environment, turn up and down the air conditioning when it hits.

195

00:15:55.350 --> 00:15:59.820

You know, it hits.

196

00:15:59.820 --> 00:16:05.550

Um, what does that look can they can they see that little dial? Or do they need a nest or.

197

00:16:05.550 --> 00:16:09.060

Um, a home smart home system, like Alexa throughout the house.

198

00:16:09.060 --> 00:16:17.190

Do they need a medical alerts have done like, occurs our merge, which is a personal emergency response device.

199

00:16:17.190 --> 00:16:20.910

Our medical emergency response by those would be.

200

00:16:20.910 --> 00:16:26.560

All under assistive technology mostly what would be some of the things.

201

00:16:24.540 --> 00:16:29.280

Leslie, what would be some of the things under that would just be.

202

00:16:29.280 --> 00:16:33.600

Not have to use the decision tree for.

203

00:16:33.600 --> 00:16:39.540

So, I think they, um, and it's going to you're going to get to this slide Holly I am.

204

00:16:38.940 --> 00:16:43.190

I am, and I think it's actually in 1 more slide. It actually.

205

00:16:42.390 --> 00:16:48.270

So we had so the division worked with no health net.

206

00:16:48.270 --> 00:16:51.930

Um, to develop a table, um.

207

00:16:51.930 --> 00:16:55.500

And for support coordinators, it's in a support coordination manual.

208

00:16:55.500 --> 00:17:01.320

And it actually talks it and gives you examples of items that would qualify under waiver.

209

00:17:01.320 --> 00:17:05.670

Um, so that could include, like we said, in comments supplies.

210

00:17:05.670 --> 00:17:08.730

Clothing protectors diaper wipes.

211

00:17:08.730 --> 00:17:12.119

Door knob extenders eating aides.

212

00:17:12.119 --> 00:17:16.770

Harness for car seats shower caddy shoehorn.

213

00:17:16.770 --> 00:17:20.760

Any sensory equipment maybe some adaptive boys.

214

00:17:20.760 --> 00:17:25.680

That's good plate. Um, I'm moving say, uh.

215

00:17:25.680 --> 00:17:30.810

Gate belt sweeping pains, toilet arm, rest a wash.

216

00:17:30.810 --> 00:17:34.710

A vertical rail transport chairs to fat sponges.

217

00:17:34.710 --> 00:17:39.030

Those are just some examples of items that would go ahead and qualify.

218

00:17:39.030 --> 00:17:47.700

Under, and those are, of course, are all portable you can take them with you if you move from 1 home to another very easily.

219

00:17:55.960 --> 00:17:59.570

For some of course, we've kind of narrowed.

220

00:17:59.570 --> 00:18:02.760

That down to vehicle and home modifications and.

221

00:18:02.760 --> 00:18:15.480

Sarah lists, or glides or things of that nature, because that does involve installation and that would be attached to the home and requires specialized installation of someone who understands and has the certification to do that. Um, some areas that might be.

222

00:18:13.650 --> 00:18:21.140

Um, some areas that might be, um, because of the advancement and products, we could look at bathtub or grab bars. Um, that might.

223

00:18:19.680 --> 00:18:26.740

Cars that might require decision tree because we see where a lot of times those are made in a more portable effort these days they may have.

224

00:18:25.940 --> 00:18:31.650

These days they may have section cuts rather than installation into the wall. And so those are things.

225

00:18:30.450 --> 00:18:35.040

And so those are things that would need to be looked at with maybe a unique lens.

226

00:18:35.040 --> 00:18:41.420

In the respect of how does this best fit the individual if it is someone who needs some significant weight bearing, perhaps those.

227

00:18:39.950 --> 00:18:43.950

Bearing perhaps those section cut grab bars are not the most, um.

228

00:18:43.950 --> 00:18:47.870

Most beneficial, they need something that's attached to the wall. So sometimes.

229

00:18:46.950 --> 00:18:58.410

So, sometimes there's using the decision tree is valuable, because it allows you to look at your unique situation and really meet the needs of that individual. Thank you.

230

00:18:58.410 --> 00:19:02.010

Um, I think this.

231

00:19:02.010 --> 00:19:05.220

Are the charts you are referring to in our last.

232

00:19:05.220 --> 00:19:09.380

Can you tell us.

233

00:19:09.180 --> 00:19:12.870

Yes, so again we worked with Mo, health net.

234

00:19:12.870 --> 00:19:16.770

To develop the mental health in an document, which is in section 8.

235

00:19:16.770 --> 00:19:19.980

H, excuse me of the support coordinator manual.

236

00:19:19.980 --> 00:19:26.060

And I think Holly, you even gave that resource link a while a couple of slides ago. And so.

237

00:19:23.190 --> 00:19:27.460

A couple slides ago and so basically before using.

238

00:19:27.460 --> 00:19:33.690

Any waiver you must consider what whether an item or supply might be covered.

239

00:19:33.690 --> 00:19:38.850

By email, health net, the exception process, or even the pharmacy program.

240

00:19:38.850 --> 00:19:41.880

And there are 4 tables in this document to assist.

241

00:19:41.880 --> 00:19:45.360

With what might be covered or not covered by no health net.

242

00:19:45.360 --> 00:19:53.910

Based on the individual's age, and also items that.

243

00:19:53.910 --> 00:20:02.520

During the previous slide, so very, very useful document and I would encourage you to go out and take a look at this. Thank you.

244

00:20:02.520 --> 00:20:07.280

So, remember that the waiver.

245

00:20:05.880 --> 00:20:12.060

Remember that the waiver.

246

00:20:10.350 --> 00:20:15.430

So, if you could find another way to do it, make sure that it's.

247

00:20:14.430 --> 00:20:19.540

Make sure that it's all there utilization of the manuals.

248

00:20:17.940 --> 00:20:23.500

Utilization of the manuals is a great way to provide guidance and resource to the planning team.

249

00:20:22.500 --> 00:20:26.160

To the planning team to ensure that we're providing the right service.

250

00:20:26.160 --> 00:20:29.970

To meet the individual's life outcome, remember our, our.

251

00:20:29.370 --> 00:20:34.570

Our our goal is is independence and crosstalk.

252

00:20:32.540 --> 00:20:37.130

And frustrating and creating more independent.

253

00:20:41.230 --> 00:20:44.350

For billing can occur. This is a question that.

254

00:20:44.350 --> 00:20:49.610

I I understand gets quite a bit for do you.

255

00:20:47.370 --> 00:20:52.810

For a, do you want to elaborate? Maybe a little bit more on that. Shelly what what is it.

256

00:20:52.810 --> 00:20:58.250

Mean that's a whole project must be completed before billing. So if there's an evaluation.

257

00:20:56.850 --> 00:21:02.010

So, if there's an evaluation that the bathroom modification needs to be completed, in order for that.

258

00:21:02.010 --> 00:21:07.350

Bathroom to be fully accessible for the individual and let's say that includes flooring and a new shower.

259

00:21:07.350 --> 00:21:10.620

Um, or tub perhaps and, um.

260

00:21:10.620 --> 00:21:15.480

You know, there's a decision to maybe well, this year, we'll do the flooring and next year we'll do the tub.

261

00:21:15.480 --> 00:21:23.610

Well, that's really a package deal because in order for that person to be to have a truly accessible bathroom, they need to have both of those features completed.

262

00:21:23.610 --> 00:21:35.150

So this is not an opportunity where we can always split the jobs. So, if that is how it was presented, the both, those are needs, then we need that job to be completed before billing can occur.

263

00:21:33.690 --> 00:21:38.040

Thank you. I know. That's a question. We get a lot.

264

00:21:38.040 --> 00:21:43.210

Who are you that email? So I wanted to make sure we talked a little bit about it.

265

00:21:42.210 --> 00:21:45.870

A little bit about it here and kind of help guide some folks.

266

00:21:45.870 --> 00:21:52.530

Of course, don't ever feel shy to use that you that email either. We're, we're happy to help.

267

00:21:52.530 --> 00:21:59.420

And some other additional ideas for funding, check out your local SSP, 40 boards.

268

00:21:56.970 --> 00:22:03.330

Check out your local SB, 40 boards, and some of them have grants are additional funding that can be used to help.

269

00:22:00.390 --> 00:22:04.320

Grants our additional funding that can be used to help support.

270

00:22:04.320 --> 00:22:08.850

All 3 of these services and 18.

271

00:22:08.850 --> 00:22:13.470

I know here locally in.

272

00:22:13.470 --> 00:22:17.060

And have some ports and assistive technology effort.

273

00:22:17.060 --> 00:22:23.120

And don't get.

274

00:22:21.020 --> 00:22:25.020

Resources some ideas that we've had success with.

275

00:22:25.020 --> 00:22:32.250

Before is the bfw churches, independent living centers and sororities and fraternities.

276

00:22:30.450 --> 00:22:34.990

And sororities and fraternities have to do service projects so to the boy scout. So.

277

00:22:33.540 --> 00:22:39.880

So do the Boy Scouts so if it's something that you think that can be done through a.

278

00:22:36.900 --> 00:22:43.590

That can be done through a community project. Not only. Is that a great way to support other.

279

00:22:41.190 --> 00:22:46.460

Not only is that a great way to support other local efforts but it's a great way to build a.

280

00:22:44.460 --> 00:22:50.750

Um, efforts, but it's a great way to build community around that individual as well. Um, so.

281

00:22:49.440 --> 00:22:53.160

Um, so that's it for our presentation today.

282

00:22:53.160 --> 00:22:59.650

Shelly, we've done really good so far of keeping our lunch and learns less than 30 minutes. Um, our next 1 will be on June.

283

00:22:56.960 --> 00:23:02.660

Our next.

284

00:23:00.030 --> 00:23:05.770

14 2022 at noon, and always be on the lookout for more learning.

285

00:23:03.570 --> 00:23:05.815

Um, and always be on the lookout for more learning and.
